

CA 01
COMPANION ARMCHAIR

Description

The companion chair is designed for the companions to be comfortable and to lie down or to sleep when necessary

The seat is suitable for single use

All internal metal parts are painted with electrostatic powder coating

The seat can be made by synthetic and cotton fabric or vinlex as per customer request

The seat takes the form of a bed by pushing the seat forward while moving the back to a position parallel to the ground in one movement. In order to get back to the chair position, the same movement must be made in the opposite direction.

Plastic wedges of 3 cm thickness are also available in the parts that touch the ground on the seat

Two wheels are available at the front for easy movement

For more color options please get contact to authority
