

STRETCHER

ST 02 LUNA

ST 02 LUNA Stretcher

Description

With user & consumer oriented design the emergency stretcher has a fixed height with back rest adjustment, comfortable upper up holstery and a protective barrier.

ST 02 LUNA model stretcher meets at the basic level first aid, mobilization and transfer operations. It provides ease of use to the patient with safe side barriers, and to the healthcare worker with push / pull bars.

Thanks to its separable upper platform, ST 02 LUNA can be used in extreme sports conditions and war zones, ie on sloped and natural grounds.

At the same time, this feature facilitates the transfer of the patient to another stretcher or bed. And it also facilitates the removal of the patient from the ground or surface where they are located.

Stretcher ST 02 LUNA provides patient safety at the highest level thanks to its seatbelts, while its steel construction lower trolley and 125 mm 360 degrees wivel castors with no brakes can be used in Professional area and artificial floors.
