

PRO28F booth is a complete and excellent solution for hearing screening and diagnostic tests in audiology centers and shops. Thanks to the innovative internal isolating material, it provides outstanding sound attenuation. Internal walls are covered with washable, fireproof, non-perishable acoustic fabric. Available in two sizes: 1 x 1 provided with silenced ventilation system and vertical window on door, on request supplied with 4 castors; SLIM (96 x 74 cm) designed to pass standard doors with a width of 83 cm and fully mobile with castors.

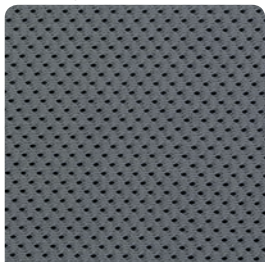

- Outstanding noise attenuation up to 43 dB
- Innovative internal acoustic lining
- Reversible magnetic door
- Ready for use in few minutes
- Available on wheels
- Built-in silent ventilation system
