

Sterling 3 Section Couch

Like the 2 Section Model, the Sterling 3 Section Couch is excellent value for money and the 3 section format provides a more versatile and comfortable position for seated procedures and examinations. The backrest support can be raised and fully adjusted from horizontal to +85° and the foot section is adjustable from -20° to +40° and can also be used as the head end for prone treatments with the option of adding a breathing hole and plug. The couch is therefore suitable for a wide range of examination and minor treatment procedures. A hand switch is fitted as standard for height control with a foot switch available as an option.

Models
