## **Xenox M100**

Mobile DR x-ray system

[www.sternmed.de](http://www.sternmed.de)

# ***STERNMED***<sup>®</sup>

**Xenox M100 is a fully digital mobile x-ray with flat panel technology made of amorphous silicon. In the Xenox M100, the high Frequency Stable Operating Technology brings the stability to generator producing quadrate wave and the tube to provide better penetration. A circuit is designed to constantly inspect the tube and protect from overloading.**

# Xenox M100

## Mobile DR x-ray system

**Surplus X-Ray tube heat capacity to protect tube and main unit. Equipped with a buzzer that alarms and displays on the main unit immediately when operator finishes the accurate exposure or sets up unreasonable parameters. The Xenox M100 provides a faster and more optimized clinical work flow.**

**The APR setting make it possible for X-Ray patients to take a variety of clinical examinations.**

### FEATURES

- Advanced technologies
- Optimized clinical workflow
- Outstanding operability
- Efficient APR function
- Fast bedside imaging
- Automatic image processing
- Fully DICOM compatible
- Superior DR image quality

## ADVANCED TECHNOLOGIES

### HSO technology

(High-frequency stable operating technology)

With the advanced high-frequency stable operating technology, the generator produces stable quadrate wave, and the tube offers high penetration and high quality X-ray.

### IOP technology

(Intelligent overload protection technology)

The anti-overload circuit of tube incessantly inspects the surplus X-ray tube heat capacity to protect the tube and main unit.

### PEA technology

(Precise exposure alarm technology)

When operator finishes the accurate exposure or sets up the illogical exposal parameters, the buzzer will alarm and display on the main unit immediately.

## OPTIMIZED CLINICAL WORKFLOW

Xenox M100 is a digital mobile radiography system with digital FPD technology, and fast digital image display on the control monitor. It enables a daily workflow without interruption- no cassettes, no waiting time for cooling or recharging of the detector. The unique touch screen allows easy control of the desired examination. Compared with analog unit, the digital filmless images are displayed on the touch screen instantaneously after exposure.

## OUTSTANDING OPERABILITY

Xenox M100 provides you with faster and optimized clinical workflow. With the compact design, outstanding imaging power, easy maneuverability and positioning, Xenox M100 offers you more digital advantages.

## EFFICIENT APR FUNCTION

Anatomically Programmed Radiography (APR) settings make it possible for X-ray patients to take various examinations, especially for ICU patients. Meanwhile, wrong or missing filters can be eliminated. Most notably, pediatric examinations can be achieved with low X-ray exposure.

## AUTOMATIC IMAGE PROCESSING

In addition, Xenox M100 allows basic image processing to function directly, such as adjusting brightness contrast, and edge enhancement etc. After exposure, the images can be processed automatically with the self-installed software. Compared with analog unit, there is no need of exposure again when parameters or operations happened to be missing.

## FULLY DICOM COMPATIBLE

The DICOM function facilitates more convenient patient registration. Sending and printing functions enable easy transmission and printing of all X-ray images to the hospital network.

## SUPERIOR DR IMAGE QUALITY

With the advanced HSO, IOP, PEA technologies and high quality imaging system, our Xenox M100 offers you high spatial resolution, high density resolution, and high sharp images.

## OUTSTANDING FEATURES

- Light weight
- 30KW rated power suitable for wide clinical applications
- Articulated arm suitable for different X-Ray positions
- User-friendly workstation with 15" LCD touch screen
- Advanced APR function
- Advanced Flat Panel Technology-Amorphous Silicon
- Fast bedside imaging
- Automatic image processing
- Multiple peripheries including USB, DICOM and burning CD
- Cutting-edge image quality
- Intelligent anti-collision design

## EXCELLENT CLINICAL IMAGES

## TECHNICAL SPECIFICATIONS

### Xenox M100 | SternMed mobile DR x-ray system

Power Supply Strd: Voltage 230V  $\pm$  10%, 50/60Hz, 16A max. Opt: 115 Vac  $\pm$  10%

#### X-RAY RACK

Rack Style	Folding arm
Height	1430mm
Minimum distance of focus from the ground	525mm
Maximum distance of focus from the ground	1992mm
Folding arm rotation angle	$\pm 90^\circ$
Could be crossed obstacle height	25mm
Weight	330 Kg

#### X-RAY TUBE

Tube style	Combined
Power	32kW
Focus	0.6/1.3mm
Anode heat capacity	107kHU

#### HIGH VOLTAGE GENERATOR

Control mode	Two level exposure, exposure switch cable Stretchable 5 meters length
Rated output power	30kW
Inverter frequency	100kHz
Output voltage range	40~125kV, step 1kV
Maximum tube current	200mA
mAs range	0.5-200mAs
Exposure time range	1ms~1.3s

#### HIGH PRECISION ADJUSTABLE COLLIMATOR

Inherent filtration	2.0mmAl
Light field shape	Rectangle
Taping	Taping SID

#### VARIAN DIGITAL FLAT PANEL DETECTOR

Panel type	Amorphous silicon
Panel size	14x17 inch
Pixel matrix	3072 x 2560
Pixel pitch	139 $\mu$ m
Conventional spatial resolution	3.6lp/mm
Fill factor	100%
Dynamic output range	14bit
Imaging time	6s(8s with image processing time)
Weight (including housing)	approximately 5kg
Cable length	8m

#### IMAGE ACQUISITION WORKSTATION

##### COMPUTER SYSTEM

CPU	Intel Core 2, 2.33GHz
RAM	2 GB DDR2
Hard disk	320 GB
Operation system	WINDOWS XP
Peripheral Interfaces	USB, mouse, keyboard
Monitor	touching type 15" LCD screen

## TECHNICAL SPECIFICATIONS

### Xenox M100 | SternMed mobile DR x-ray system

#### SOFTWARE SYSTEM

Patient management	Patient information registration, preservation, setting, appointment, query and other functions
Examination management	System parameter setting, exposure collection, automatic image processing, etc.
Image browse	Image selection, image processing (cropping, scaling, gray adjustment, rotation, flip, tag, window layout, etc.)
Image postprocessing	Image enhancement, tissue equalization, noise reduction, gray scale value stretch
Image export	Support exporting to laser printer, laser camera DICOM interface and hard disk, etc.
Data management	Data deletion, statistics, editing, backup and recovery
Other functions	Detector calibration procedure, fault error function, Worklist module, a dynamic password maintenance function, and has the report printing function

#### OPTIONAL

##### GRID INCLUDING VARIAN GRID FIXING DEVICE

Size	498.5X449 mm
Grid density	80Line/cm
Grid ratio	8:1
Grid focal length	130cm
Filter grid type	Fixed carbon fiber materials cover

##### WIRELESS REMOTE CONTROL

Wireless remote control exposure distance	10m
