Managing Director

CLEANABILITY

We, Villard Medical Company, situated at ZA de Chapeau - Route de Ballon, 72190 Neuville/Sarthe, France declare that our range of EOLIS trolleys has been particularly designed for the maximum cleanability. The design, the round corners, the smooth surface, the possibility to take out the rolling shutter without any tool, enables a perfect cleaning capacity.

The bottom shelf is designed with a hole to drain the water out during the cleaning process.

The material resists to all the disinfectants currently used in hospitals.

Neuville/Sarthe, January 16th, 2026

Franck ESCLAPEZ
Managing Director

MAINTENANCE AND CLEANING PROCEDURE

The goal of the cleaning is to obtain a perfect clean surface respecting the hygiene (absence of stains, pathogenic microorganisms, common pollution microorganisms, detergent or disinfectant product marks...)

Operating mode:

For a perfect preservation of your articles, we advise you to proceed following the steps below:

- Use water with soap or disinfectant products for an easy cleaning. While cleaning never use aggressive and abrasive products;
- Rinse the surface (only if it is recommended by the manufacturer);
- Dry the surface.

Use a soft rag or a soft wipe rather than tools with abrasive surfaces (such as hard brushes or scrape-out sponges).

Despite the entire rigor during the design and manufacturing of the equipment, the risk of dust accumulation remains. We recommend you to be very careful during the disinfection of this material.

If you have particular questions, you may contact our technical or commercial department at: +33 (0)285 290 500.

CERTIFICATE

ISO 9001:2015

DEKRA Certification SAS certifies that

VILLARD ENVIRONMENTAL COMMITMENT

In coherence with its values, the company VILLARD hereby, commits itself to implementing, steadily, every improving action in order to maximize its environmental performances, to prevent the potential pollution risks and to contribute responsibly to the preservation of our environment and its natural resources.

In this context, VILLARD commits itself to complying with the legal requirements applicable to its production site and related to the environmental impact.

Industrial processes used by VILLARD forbid polluting compounds such as VOC (Volatile Organic Compounds), heavy metals, and others toxic components. VILLARD works regularly with several specialized sectors for the evacuation, the treatment and recycling of production waste.

The first awareness of the employees has been carried out through the adoption of the current Environmental Procedures Charter in the company.

By an ongoing awareness, VILLARD will get involved in improving some behaviors, in completing some processes, in precisising some rules in order to obtain an efficient and daily involvement of all employees for the respect of the environment. Villard will extend its action plan, by informing its main partners-customers and suppliers and by inciting them to move forward in the same direction.

Finally, in the new field of product conception, VILLARD will take into account this generalized environmental approach, so that, in the limit of technical feasibilities and acceptable costs for the market, reductions in volume and recycling of components are privileged.

In this way, VILLARD commits itself to participating in the preservation and the transmission of our resources.
