

MEASURING INSTRUMENT

Obstetric tape measure

Centimetre scale with fundal height markings

DESCRIPTION

Retractable tape measure for obstetric monitoring. The front face carries a centimetre scale, while the reverse shows fundal height markings, allowing the measurement taken to be related immediately to the stage of pregnancy.

Supplied in a compact transparent case that protects the tape and makes it easy to carry.

SPECIFICATIONS

Specification	Value
Front face	Centimetre scale
Reverse face	Fundal height markings
Packaging	Transparent retractable case
Intended use	Antenatal clinics, delivery rooms, midwifery practices

KEY BENEFITS

- Dual reading: metric measurement and obstetric interpretation on the same tape.
- Transparent case: immediate visual check on the condition of the tape.
- Pocket format with automatic retraction.

Manufacturing and distribution — IBSGROUPE Ltd, as a turnkey supplier, handles the distribution, logistics, commissioning and after-sales service of this product. Manufacturing is carried out by the partner manufacturer, whose part numbers and specifications are reproduced above. *Non-contractual document: specifications may be changed by the manufacturer without prior notice; where the text and the illustration differ, the text prevails.*
