

MOTOR-SKILLS EQUIPMENT

Psychomotor foam modules

Set of 19 multicoloured foam modules

DESCRIPTION

This psychomotor set comprises 19 multicoloured foam pieces. Children can arrange the modules however they wish to build structures or motor-skills courses.

The variety of shapes — cubes, cylinders, half-rounds and roof forms — allows sessions to evolve over time and supports work on balance, coordination and spatial awareness.

SET CONTENTS

Quantity	Item	Dimensions
8	Modules	90 × 30 cm
10	Modules	30 × 30 cm
1	Cylindrical module	Ø 60 cm
19	Total set	—

FEATURES

- Foam core with a soft, washable cover.
- Multiple colours to aid recognition and play.
- Modules stack and combine freely.
- Intended for psychomotor rooms, nurseries, rehabilitation centres and paediatric departments.

Please note — Motor-skills activities must be supervised by an adult.

Manufacturing and distribution — IBSGROUPE Ltd, as a turnkey supplier, handles the distribution, logistics, commissioning and after-sales service of this product. Manufacturing is carried out by the partner manufacturer, whose part numbers and specifications are reproduced above. *Non-contractual document: specifications may be changed by the manufacturer without prior notice; where the text and the illustration differ, the text prevails.*
