

Manufacturer's product photograph.

## FEATURES

- Phase-change cooling element maintaining a stable 2 degC to 8 degC range
- Designed for vaccine and pharmaceutical cold chain transport - no risk of freezing the load
- Rigid PE natural housing, reusable and easy to clean
- Sealed with laminated aluminium film and plastic protective cap
- Blue fluid for immediate visual identification of the 4 degC range

## TECHNICAL DETAILS

|                              |                                           |
|------------------------------|-------------------------------------------|
| Temperature range maintained | +2 degC to +8 degC                        |
| Volume                       | 2 L                                       |
| Dimensions (L x W x H)       | 319 x 275 x 35 mm                         |
| Weight (filled)              | 2.5 kg                                    |
| Housing material / colour    | PE, natural                               |
| Fluid                        | Blue                                      |
| Sealing                      | Laminated aluminium film + protective cap |
