

Manufacturer's product photograph.

FEATURES

- Real-time remote temperature tracker with 4G/2G data transmission
- Annual rental formula including the device and 12 months of cloud service
- Internal and external temperature sensors, relative humidity and light sensor
- Light sensor detects container opening - shipment integrity monitoring
- LCD status display showing current values and alarms
- LBS/GPS geolocation - values and alarms transmitted to the cloud server
- Configuration, reporting and data access via the myThermoScan.info web platform

TECHNICAL DETAILS

Transmission	4G / 2G
Internal sensor range	-20 degC to +60 degC
External sensor range	-80 degC to +120 degC
Accuracy (external) / resolution	0.15 degC / 0.1 degC
Relative humidity / light	0 to 100 % / 0 to 100 %
Geolocation	LBS / GPS
Memory capacity	17,000 readings
Display	LCD - current values and alarms
Dimensions / weight	100 x 66 x 29 mm / 165 g
Service included	myThermoScan.info platform, 12 months
