

Manufacturer's product photograph.

FEATURES

- Liquid-in-glass thermometer mounted in an unbreakable plastic bottle filled with liquid
- The filling liquid buffers temperature variations caused by door openings, giving readings representative of the stored products
- Thermometer safely encapsulated in PTFE - protection against breakage and contamination
- For freezers, refrigerators, cold rooms, blood bank refrigerators, incubators and warming cabinets
- Supplied with test certificate and individual serial number

TECHNICAL DETAILS

Measuring range	+18 degC to +50 degC
Graduation	0.5 degC
Thermometer liquid	Red alcohol
Bottle filling liquid	Ethylene glycol
Encapsulation	PTFE (Teflon) coated
Length	135 mm
Certificate	Test certificate + individual serial number
