

- Body Mass Index (BMI) calculation function.
- Two-stage height measuring rod (60 cm to 210 cm).
- Large, easy-to-read 20 mm LCD display panel.
- Accurate and stable weighing performance.
- Battery saving mode and automatic power off.
- Up to 70 hours of continuous operation with rechargeable battery.
- Heavy-duty structure resistant to overload and impacts.
- Electrostatic powder painted durable body for medical environment.
- Portable design with integrated transport wheels.

TECHNICAL DETAILS

Capacity:	200 kg
Graduation:	100 g
Platform Dimensions:	35 x 40 cm
Height Range:	60 – 210 cm
Display Type:	LCD (20 mm)
Power Supply:	Mains & Battery
Battery Operating:	Up to 70 Hours
Body Weight:	12.5 kg
